JMP® Software: Academic Licensing

From SAS, the leader in statistics and analytics software

What is JMP®?

Statistical discovery software
JMP is easy-to-learn statistical software for Mac and Windows. Ideal for both teaching and learning statistics, JMP allows professors to spend more time teaching statistics and less time teaching software. JMP is also ideal for doing statistical analysis, so with JMP, students learn a tool they will use in practice.

Visual, interactive, all-inclusive and extensible
In JMP, interactive graphs always accompany statistics. JMP includes everything you need, from basic to advanced statistical tools and analyses.

You can easily access data in Excel and from other programs, interactively query ODBC databases, scrape data from the Internet, and even call on your other favorite software platforms, including SAS®, R and MATLAB.

A family of products
- **JMP** is ideal for coursework in a broad range of subjects, including introductory statistics, regression, linear models, design of experiments, quality control, reliability, multivariate analysis, predictive modeling and applied forecasting.

- **JMP Pro** includes all of the features of JMP, plus exact tests, mixed models, penalized regression methods, bootstrapping, and advanced tools for predictive modeling.

- **JMP Genomics** and **JMP Clinical** are life sciences products dedicated to analysis of genomics and clinical data.

- **JMP Student Edition** is a streamlined version of JMP designed to meet the needs of secondary schools and AP statistics.

JMP® Software: Academic Licensing

From SAS, the leader in statistics and analytics software

How to Get JMP®

Academic Suite:
Unlimited department- or campuswide license
An annual fee site license, giving all faculty, students and researchers unlimited access to the full capabilities of JMP and JMP Pro for Mac and Windows for academic purposes.

Includes SAS technical support, home use, free updates to the latest version and access to select JMP e-learning courses.

JMP Genomics and JMP Clinical site license
A department- or campuswide annual license with unlimited use.

Single-user perpetual JMP license for academic use
Academics can purchase a license for JMP at a one-time cost for a version that never expires.

***New*: Single-user JMP Pro license for academic research**
Three- or five-year single-user license of JMP Pro that includes full technical support and free version upgrades.

Single-user six- or 12-month student license
A full-featured version of JMP for academic course use, with a student's budget in mind. Available from **onthehub.com/jmp**.

JMP Student Edition
A feature-limited version of JMP, available as a low-cost multiyear license for unlimited use in the classroom or on school-owned computers. Available free with textbooks from major publishers.
